## PROFESSIONAL SUMMARY

Final-year Integrated MCA student and published IEEE co-author specializing in **full-stack web development (MERN)** and **applied deep learning / computer vision**. Experienced in building end-to-end systems using **React.js, Node.js, Express.js, MongoDB, REST APIs**, and deep learning frameworks including **CNN, YOLO, and EfficientNet-B0** for real-time detection and classification tasks. Strong foundation in **data structures, algorithms, and problem-solving**, with proven ability to take projects from design through deployment.

## TECHNICAL SKILLS

**Languages:** Python (Intermediate), Java, C
**Web Development:** HTML, CSS, JavaScript, React.js, Node.js, Express.js, REST APIs, React Router, Axios
**Machine Learning / Deep Learning:** CNN, YOLO, EfficientNet-B0, MediaPipe, Feature Extraction, Model Classification, Dense Neural Networks, Dropout Regularization
**Database:** MongoDB, Mongoose, SQL Server
**Tools & Platforms:** Git, GitHub, VS Code, Postman, MongoDB Compass
**Core Competencies:** Data Structures & Algorithms, Problem-Solving, Responsive Design, API Design, Object-Oriented Programming

## PROJECTS

**ATM Management System** *Dec 2022 – Mar 2023*
*C#, ASP.NET, SQL Server, Windows Forms*

- Developed a secure ATM management system with core banking features: deposit, withdrawal, balance inquiry, and mini-statement generation.
- Implemented Fast Cash withdrawals and PIN-based authentication with data encryption to safeguard user transactions.
- Built the backend logic in C#/ASP.NET with a Windows Forms GUI, backed by SQL Server for secure transaction and account data management.

**Car Wash Appointment Scheduling System** *Jan 2024 – Mar 2024*
*React.js, Node.js, Express.js, MongoDB*

- Developed a full-stack web application to book, update, and cancel appointments in real time.
- Built a responsive frontend using React.js and Bootstrap, with a RESTful backend powered by Node.js and Express.js.
- Designed MongoDB schemas with Mongoose for schema validation and efficient data handling.
- Implemented date, time, and contact-field validation to ensure scheduling integrity.

## RESEARCH PUBLICATIONS

**Real-Time Snake Detection and Recognition Systems in Videos Using Deep Learning** *Aug 2024*
IEEE ICNEWS 2024 (Bangalore) DOI: 10.1109/ICNEWS60873.2024.10730860

- Co-developed a CNN + YOLO-based real-time system for snake detection and species recognition from video streams.
- Applications in wildlife conservation, emergency response, and ecological research.
- **Role:** Co-Author & Presenter.

**EfficientNet-B0-Based Privacy-Preserving Facial Stress Detection Using Forehead and Eyebrow ROIs** *May 2026*

- Developed a privacy-preserving facial stress detection system using only forehead and eyebrow Regions of Interest (ROIs).
- Applied MediaPipe Face Detection for facial landmark localization and automated ROI extraction.
- Employed a pre-trained EfficientNet-B0 model for feature extraction and stress classification.
- Implemented a dense neural network classifier with dropout regularization to classify Stress and No-Stress states.

## CERTIFICATES

- **Getting Started with Microsoft** *Nov 2023*
  Coursera — Certificate: TFK54FKXHK2L
- **Build a Free Website with WordPress** *Nov 2023*
  Coursera — Certificate: 85WPV7YGZVLF

## EDUCATION

**Amrita School of Arts and Sciences, Mysuru** *2021 – 2026*
Integrated MCA CGPA: 6.79

**Sri Lakshmi Hayagreeva PU College, Mysuru** *2019 – 2021*
$12^{th}$ (PCMB) 70.16%

**Vishwa Prajna Higher Secondary School, Mysuru** *2018 – 2019*
$10^{th}$ 69.28%
